) Paramerization using Excel file.

- We can parametrize tests using to excel.files
  as:

  XSSFWorkbook workbook = new XSSFWorkbook (excel
  ;
  XSSFSheet sheet = workbook.getsheet (sheetname);

① Create a method for getCellData ()
  {
     Dataformatter formatter = new Dataformatter (
     Object value = formatter.formatCellvalue
                      (sheet.getRow(i).getCell(i)}
  }

  Create a getRowCount () {

     int rowCount = sheet.getPhysicalNumberofRow
  }
